

Computer Nerd In General

By: Freddy Giordano

I started when my dad had taught me DOS when I was 8 years old
Programmed in BASIC, Word, Excel; Computers did what they were told
From there I learned HTML and CSS for web download
And then I used the JavaScript to read XML to the node
Learned ActionScript from Kirupa, Senocular, folks I don't know
Made apps & graphs, played video from Flash MX to 3.0
Moved on from there, went server-side, learned PHP MySQL [also commonly called "myseque!"]
Using HTTP, SSH, & SFTP Protocol

[backup repeats

HTTP, SSH, & SFTP Protocol

HTTP, SSH, & SFTP Protocol

HTTP, SSH, & SFTP Secure Protocol]

Sidenote: It helped me to learn to sing this part
fast enough by reading:

"H-T-T-P-S-S-H-N-S-F-T-P Protocol"

I can see through binary, can tell between a byte & bit
I understand DNS Zone & SSL certificate
In audio & video & internet & technical
I am the very model of computer nerd in general

He is the very model of computer nerd in general]

I am a server admin and command line is a friend of mine
Configured .htaccess in Apache to run CGI
I know PhotoShop to assist me with graphic design
I put the MagicLantern on my Canon Rebel T2i
When you're in a hurry I'll upload your files so they're online
Crossbrowser check the canvas tags and AJAX in HTML5
I comprehend encryption hash to blowfish, salt, & md5 [that's only one way hash, you know]
Then I built an interface to my text message API
